MA PEST CONTROL LLP

- **Mosquito Control** : Mosquito's acts as a vector for deadly diseases like Malaria, Dengue, or Yellow Fever; we are the expertise in Mosquito Control, treats against these vectors in a planned and effective way.
- **Fly Control** : Flies are known to transmit Cholera, Diarrhoea, Tuberculosis, etc; our patricidal treatment assures control of housefly by checking the breeding places.
- **Termite Control** : Termites are the more prolific and a social animal poses great threat to human habits by damaging wooden structures and other building and food items. To check the termite problem, PIPC advocates two types of proofing viz. Pre Construction and Post Construction treatment with internationally known chemicals.
- **Bed Bugs Control** : Don't let bedbugs bite! we offer swift, effective bedbug elimination. Our expert team uses cutting-edge treatments to ensure your home is pest-free and comfortable again. Sleep tight with MA Pest Control LLP on your side.

It gives us immense pleasure to present **MA Pest Control LLP**, an organization with strong values and innovative methodologies. This is the conglomeration of enriched professionals with 100 man-years of collaborative experience and industry exposures. We have invested time, money and effort to proficiently serve our clients. We set ourselves significantly higher expectations with tangible cost reduction targets and key performance indicators, and that implies we are persistently improving and passing the advantages straightforwardly onto our clients and the knowledge we have gained for years made us confident enough to say **"Hygiene How? Ask me Now"**.
